REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Applicants argue that the riser card comprises the adaptive initialization module and in the prior art the signal control circuit is not on the riser card but on the motherboard. Normally the location of a component has no effect on patentability. If the signal control circuit of Lehwalder et al were moved to the riser card the system would only work as long as the riser card were present. As soon as the riser card is removed, since the signal control unit controls both the secondary codecs and the primary codec, the primary codec on the mother board would no longer work. This would be a detrimental effect to the Lehwalder et al reference, therefore moving the location of the signal control circuit of Lehwalder to the riser card would not have been obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul R. Myers whose telephone number is 571 272 3639. The examiner can normally be reached on Mon-Thur 6:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rehana Perveen can be reached on 571-272-3676. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
